

Informational Addendum for

Lori Johnson

Lori Johnson and her husband own Johnson Crushing (a rock and gravel crushing business) and Johnson Materials (operating three gravel pits providing sand, gravel, top soil and fieldstone to contractors). They have been a \$1,000 a year donor to the 1-5K event. She was an Occupational Therapist for the St Cloud School District before she began working full time in their family business.

She knows a number of the WACOSA clients because she worked with them as students...she is a strong advocate and supporter of programs and services for people with disabilities. She is also an active community member and has helped with a number of large special event fund raisers for different charities. She would make an excellent addition to the FDC and eventually a great board member...she's a real go-getter.
